

Datasheet for Decocork Thermal Paint

DECOCORK thermal paint is a cork-based flexible paint available in different colours. It will help to prevent micro cracks and **IMPROVES THE INSULATION** of the applied surface..

It is only necessary to mix the product well before its application and its great adhesion allows it to be easily applied .

It is applied by brush or airless sprayer and it is recommended to apply at least 3 layers covering the entire surface, allowing it to dry between layers.

Product Characteristics	
Density (UNE-EN ISO 2811-1)	1,25 g/cm3
Non-volatile matter (1h to 125°) (UNE-EN ISO 3251)	52,00 %
Non-volatile matter by volume (UNE-EN ISO 3233-3)	40,20 %
Drying time (UNE 48301) (dry film thickness: 95 µm)	Touch dry: 30 min. Total drying: 1h. 35 min.
Theoretical performance (R)	0,25 kg/m2 > 80 µm 0,31 kg/m2 > 100 µm
Theoretical performance (R)	5,0 m2/l >80 µm 4,0 m2/l >100 µm
pH	9±0,5
