

DECOCORK Cork Paint - Safety Data Summary

English SDS-derived summary. This is the supplied English warehouse/handling summary, not a complete manufacturer Safety Data Sheet. Use alongside the original manufacturer document and product label. Source revision: 02-02-2024. Website/PDF edition: 11 October 2026, version 1. Source check pending: the supplied summary describes paint buckets but lists a granular-solid physical state. Pack formats and physical properties need confirmation against the original SDS.

Check the edition date before use. The PDF download and this page carry matching content; consult ECOPROCORK for the current manufacturer safety document.

Document title: English SDS-derived warehouse submission summary

Product name: PINTURA DE CORCHO DECOCORK / DECOCORK Cork Paint

Manufacturer: DECOPROYEC SUBERTRES S.L.U.

Source document basis: Manufacturer SDS headed according to Commission Regulation (EU) 2020/878, last update 02-02-2024.

1. Product identification

Commercial product name: PINTURA DE CORCHO DECOCORK

Pack format: 10 kg and 5 kg buckets of paint with cork powder

Manufacturer: DECOPROYEC SUBERTRES S.L.U.

Manufacturer address: Polígono Industrial Los Molinos, C/ Trilladores nº47, 02520 Chinchilla de Monte-Aragón, Albacete, Spain.

2. Composition summary

The SDS states the product is based on crushed natural cork from cork oak.

3. Classification and hazard summary

The source SDS says DECOCORK does not contain substances classified as harmful to health or the environment, and therefore does not present any specific physical-chemical risk.

4. First aid measures

General: seek medical help if symptoms persist; do not give anything by mouth to an unconscious person.

Inhalation: move the affected person to a ventilated area or fresh air; if breathing stops, apply artificial respiration and seek medical help.

Eye contact: rinse with plenty of clean water, remove contact lenses if present, and seek medical advice if irritation persists.

Skin contact: remove contaminated clothing and wash with soap and water; do not use solvents.

Ingestion: do not induce vomiting; rinse and seek medical help immediately.

5. Fire-fighting measures

The SDS says the product contains no flammable materials in its formulation. In the event of fire, extinguishing media such as powder, carbon dioxide or water spray may be used.

6. Accidental release measures

Avoid unnecessary exposure, use suitable personal protective equipment, and prevent the spilled material from entering soil, watercourses, drains or sewers. The SDS says spills should be stopped if safe to do so, diluted with water and cleaned up or absorbed with a dry inert material into a suitable recovery container.

7. Handling and storage

Use suitable personal protective equipment where needed. Do not eat, drink or smoke where the product is handled or stored. Store in the original container, protected from direct sunlight, in a dry, cool and well-ventilated area, away from incompatible materials and food or drink. Keep containers tightly closed, sealed and upright. Do not store in unlabelled containers.

8. Exposure controls and personal protection

The SDS says no special ventilation requirements are needed and that usual ventilation should be sufficient.

Respiratory protection: not applicable.

Hand protection: chemical-resistant gloves where risk assessment indicates they are necessary.

Eye protection: suitable eye protection where splash or mist exposure may occur.

Skin protection: not specifically required in the SDS.

9. Physical and chemical properties

Physical state: granular solid

Odour: not applicable

pH: not applicable

Freezing point: not applicable

Boiling point: not applicable

Flammability temperature: not applicable

Water solubility: insoluble.

10. Stability and reactivity

The SDS states the product is stable under normal storage and use conditions, with no dangerous reactions described, no incompatible materials identified, and no hazardous decomposition products expected under normal conditions.

11. Toxicology, disposal and transport

The SDS says there are no relevant toxicity data showing significant effects or critical hazards for oral, dermal, inhalation or other routes, and no known significant effects for irritation, sensitisation, mutagenicity, repeated dose toxicity or reproductive toxicity. It also says the product is not considered hazardous waste under the cited EU directive and is not classified as dangerous for transport.

12. Warehouse handling note

For warehouse intake and storage, this product may be treated as a non-classified cork-based coating product supplied in 5 kg and 10 kg buckets, with routine controls for sealed storage, upright stacking, good housekeeping, spill prevention and standard PPE where handling risk exists. The SDS supports normal warehouse storage in a cool, dry, ventilated area out of direct sunlight.

13. Submission note

This text is an English SDS-derived warehouse summary prepared from the manufacturer's source SDS and is intended to support UK warehousing, onboarding and distribution review. It should sit alongside the original manufacturer SDS, not replace it.
